The Royal System was conceived by the Danish designer Poul Cadovius in 1948. Recognised with a Gold Medal at the Finland Furniture Fair in 1950 and a silver at Milan Triennale, the system set a benchmark for wall storage design.

One of the first wall-hung storage systems, its graceful styling and the fact it can be configured in many different combinations made it a success. Available in walnut, the system is produced to exacting standards and offers great flexibility to extend or reconfigure.

**Please note:** the pricing example is for **four walnut shelves with two 100cm rails**. Please view the product range below for rails, shelves and workstation units to complete the system.

Each shelf is supplied with a set of two stainless steel hangers.

If you require any assistance designing your shelving system please either **contact us** or use the Royal System configurator **here**.
