

Flat Pack Bird House

Designer: **SmithMatthias**

£27

DESCRIPTION

Flat Pack Bird House by **SmithMatthias**

A simple easy-to-assemble flat-pack birdhouse from SmithMatthias made with two laser cut 1.5mm thick plywood parts. Add your personal touch by adding colours and other items to the birdhouse.

Designed in 2011, the house was inspired by the tennis ball design. The two laser cut pieces curve around each other to form this adorable birdhouse ideal for birds to lay eggs and raise their young ones in a sheltered environment.

The hole is 28mm wide making it perfect for birds such as the Blue Tits, Great Tits, Coal Tits, Tree Sparrows and Pied Flycatchers, keeping larger birds at bay.

The flatpack packaging allows the birdhouse to fit through a standard letterbox.

DIMENSIONS

Made with two 1.5mm thick plywood part

Hole diameter: 2.8cm

MATERIALS

Laser cut plywood
