

Pira G2, Wall Mounted A

Designer: **Anna von Schewen**

Designer: **Bjorn Dahlstrom**

Manufacturer: **String**

£3,220

DESCRIPTION

Pira G2, Wall Mounted A by **Anna von Schewen + Björn Dahlström** for **String**.

An evolution of the Pira shelving unit, initially designed by Swedish architect Olle Pira for the H55 exhibition in 1955, was unveiled at the Stockholm Furniture Fair in February 2023.

Reimagined by architect Anna von Schewen and industrial designer Björn Dahlström, the duo has embraced the original design while giving it contemporary appeal through modern materials and subtly nods to the 1950s.

The wall-mounted unit's shelves blend seamlessly with the poles, creating a unified structure within the modular system, resulting in a functional yet visually appealing presence.

The Pira G2 shelving system is highly customisable and can be configured to fit various spaces and needs. If you are interested in creating a custom unit, please contact us [here](#).

DIMENSIONS

180w x 36d x 205cmh

MATERIALS

The poles are made of extruded aluminium in black grey or white.

The shelves are made of sheet steel and feature an integral ridge.

Cabinets and organisers in walnut or white oak.

The shelves have a 50kg load.
