

AT16 Column Coat Hanger, 1961

Designer: **Osvaldo Borsani**

Manufacturer: **Tecno**

£2,100

DESCRIPTION

AT16 Column Coat Hanger by **Osvaldo Borsani** for **Tecno**.

Almost like a miniature solar system, the AT16 column coat hanger features solid wood spheres which can rotate around the central column. Inspired by the universe, Osvaldo Borsani designed the column coat hanger in 1961. The coat hanger was re-introduced in 2012. Create an organic structure or a classic composition with all the movable parts.

The central column is height adjustable and consists of an aluminium tube wrapped in black leather hosting two concentric sliding tubes in a black anodised finish. It can be locked in position using the ring. The wooden spheres are made from solid beech wood and come in 4 different colours.

DIMENSIONS

69dia x 270/320cmh

MATERIALS

Aluminium central column with solid beechwood spheres.
