

Mirror Ball pendant light, 2002

Designer: **Tom Dixon**

Manufacturer: **Tom Dixon**

~~Was £355~~ Now £301

DESCRIPTION

Mirror Ball pendant light by **Tom Dixon**.

Drawing inspiration from classic space helmets and disco mirror balls, the Mirror Ball pendant light is achieved through a technically sophisticated process. A thin layer of pure metal is vapourised onto the interior surface of a polycarbonate globe using a vacuum deposition process.

The resulting mirror finish focuses the light generated by the bulb at the heart of the shade, projecting a broad and soft light.

DIMENSIONS

Mini: 25cm dia x 25cmh

Medium: 40cm dia x 40cmh

Large: 50cm dia x 50cmh
