DESCRIPTION

Moon by **Verner Panton** for **Verpan**.

One of Verner Panton's earliest lighting designs, Moon is characterised by its distinctive fan-like structure, which features ten ring-shaped lamellae meticulously arranged to emit a gentle, ambient, and glare-free light.

Designed in 1960, the lamp is both minimalist and bold. The blades reflect and filter the light while the pendant's appearance subtly shifts with varying angles.

A highly versatile lamp, it can complement a myriad of settings, whether showcased individually or in clusters.
