

Tip Ton UV chair, 2011

Designer: **Barber Osgerby**

Manufacturer: **Vitra**

£349

DESCRIPTION

Tip Ton UV chair by **Barber Osgerby** for **Vitra**.

Plastic UV-resistant chair with a forward-tilt action which is particularly suited to use outdoors. Its name refers to the two types of sitting experiences that characterise the chair – from a normal position, Tip Ton can be tilted a few degrees forward where it then stays in place. The forward-tilt sitting position, until now the preserve of mechanical office chairs, straightens the back and improves circulation.

The Tip Ton chair is stackable and can be stacked up to 4 chairs. Quick ship is available in the finish Glacier Blue.

DIMENSIONS

50.9w x 55.5d x 46.2/96cmh

MATERIALS

Tip Ton is made of polypropylene and is manufactured from a single mould without the use of mechanical components. This makes it extremely durable and 100% recyclable.

Available in basic dark, white, ice grey, basalt, glacier blue, olive, industrial green, and mango.

The chairs are UV-resistant and suitable for outdoor use.

Note: special additives prevent the fading of colours due to UV radiation. However, the chair may fade over time if exposed to prolonged periods of sunlight. We recommend limited exposure to sunlight.
