

Eames RE DAL Armchair

Designer: **Charles and Ray Eames**

Manufacturer: **Vitra**

£835

DESCRIPTION

Eames RE DAL Armchair by **Charles & Ray Eames** for **Vitra**.

Plastic Armchairs were first presented as part of a New York Museum of Modern Art competition, "Low Cost Furniture Design". Their organically shaped plastic seat shells were later combined with various different bases and manufactured in their millions.

The Eames Plastic Chair has undergone numerous refinements and adjustments throughout its conception in the 1950s. To enhance its sustainability the chair shells now utilise recycled materials sourced from German household waste, notably collected through the 'Der Gelbe Sack' (Yellow Bag) system and predominantly from used packaging. This shift from traditional plastic to recycled material not only contributes to a reduction in climate-damaging emissions but also conserves energy.

DAL = Dining Height Armchair La Fonda Base

Also available with upholstered seat [here](#).

Herman Miller has the sole license for the Charles and Ray Eames collection in the U.S. and the Far East. Therefore the export of these products from the UK to the U.S. is not possible.

DIMENSIONS

63w x 60.5d x 43/81.5cmh

MATERIALS

Polished die-cast aluminium base. The seat is made from recycled postconsumer waste.

Please note that due to the nature of the material, the recycled shells will exhibit very subtle specks of pigment. There may also be slight colour variations between seats.

All chairs come with basic dark glides for carpet as standard. For other options, including felt glides for hard floors, please enquire.
