

Eames RE DSX Side Chair | Upholstered

Designer: **Charles and Ray Eames**

Manufacturer: **Vitra**

£430

DESCRIPTION

Eames RE DSX Side Chair | Upholstered by Charles + Ray Eames for Vitra.

Eames Plastic Side Chair is a contemporary version of the legendary Fiberglass Chair. It was produced in collaboration with Zenith Plastics for the Museum of Modern Art in New York's Low-Cost Furniture Design Competition and was the first industrially manufactured plastic chair.

The Eames Plastic Chair has undergone numerous refinements and adjustments throughout its conception in the 1950s. To enhance its sustainability the chair shells now utilise recycled materials sourced from German household waste, notably collected through the 'Der Gelbe Sack' (Yellow Bag) system and predominantly from used packaging. This shift from traditional plastic to recycled material not only contributes to a reduction in climate-damaging emissions but also conserves energy.

Also available without upholstery [here](#).

Herman Miller has the sole license for the Charles and Ray Eames collection in the U.S. and the Far East. Therefore the export of these products from the UK to the U.S. is not possible.

DIMENSIONS

46.5w x 55d x 39/83cmh

MATERIALS

Four-legged tubular steel base, chromed or powder-coated in basic dark.

The seat is made from recycled postconsumer waste.

Please note that due to the nature of the material, the recycled shells will exhibit very subtle specks of pigment. There may also be slight colour variations between seats.

Upholstered seat or fully upholstered front in Hopsak fabric (pdf of colours available to download in Product downloads). Fully upholstered front is available with white or black piping.

Supplied with basic dark glides for carpet or hard floor. White also available; please enquire here for details.
