

## EVO-C Chair

Designer: **Jasper Morrison**

Manufacturer: **Vitra**

£355

## DESCRIPTION

**EVO-C Chair** by **Jasper Morrison** for **Vitra**.

The EVO-C chair is a contemporary iteration of the classic cantilever chair. Thanks to modern technologies, plastic structures can achieve the strength and rigidity of tubular steel designs.

The structure is formed from 100% recyclable polypropylene injection moulded components that seamlessly blend with the planar surfaces of the seat and back. The use of a single material gives this chair a consistent appearance.

The chair's silhouette is thin enough to almost disappear behind the sitter and when not in use, the chair resembles a sculpture organically growing out of the ground.

## DIMENSIONS

46.5w x 51d x 44/81.5cmh

## MATERIALS

100% recyclable polypropylene.

Available in three colours: Poppy Red, Ivory, Graphite Grey and Light Mint.
