

Soft Modular two-seat sofa, 2016

Designer: **Jasper Morrison**

Manufacturer: **Vitra**

£4,560

DESCRIPTION

Soft Modular two-seat sofa by **Jasper Morrison** for **Vitra**.

The Soft Modular Sofa is Jasper Morrison's riff on the modern settee. Combining pure proportions with remarkable comfort, the range embodies unrestrained clarity through a low-slung seat with notable horizontal vigour.

It has been conceived in line with Jasper Morrison's philosophy of 'super normal' design, which centres on the reinterpretation and development of what already exists instead of pursuing unusual and grand paths.

The modular design of the Soft Modular Sofa allows it to function as an architectural feature that can be customised to suit any interior. The range consists of a two-seat and three-seat sofa, side, corner and central elements as well as a chaise long; the Soft Modular Sofa can be customised to suit a wide range of requirements.

Pricing example is for **two side elements** that form a **two-seat sofa**, as seen on main image. Please enquire for details of all elements in the Soft Modular range.

DIMENSIONS

238w x 98d x 38/64.5cmh

MATERIALS

The Soft Modular sofa has a seat made from a steel frame, wood construction with steel springs, polyurethane foam structure and visco cover. Arm and backrests made of wood construction with polyurethane foam structure and chamber cushion overlay (filling made of polyurethane foam rods and polyester fibres).

Please view the pdf in the download section to view the range of removable covers in fabrics and leathers of the collection. Material samples available to view at our shop and showroom as well.
