

Table Solvay, 1941

Designer: **Jean Prouve**

Manufacturer: **Vitra**

£4,130

DESCRIPTION

Table Solvay by **Jean Prouve** for **Vitra**.

During the years of 1941 and 1942, Jean Prouve's studios planned and realised various interior design projects for the chemical company Solvay. This wooden table is a prime example of Prouve's work, with a characteristic sense of dynamism and solidity.

This product was designed during World War II and the table legs were made of wood due to the ongoing shortage of metal.
