

VP Globe Pendant

Designer: **Verner Panton**

Manufacturer: **Verpan**

£834

DESCRIPTION

VP Globe Pendant by **Verner Panton** for **Verpan**.

During a visit to Venice, Italy, Verner Panton grew enamoured by the light emitted by the old street lamps in the city; this inspired him to create a simulation of that unique experience, leading to the inception of the VP Globe in 1969.

Widely considered one of Panton's most iconic creations, the VP Globe features a distinctive layered structure, five internal reflectors suspended by three steel chains and an acrylic globe that emits a gentle, warm light.

This version of the design incorporates splashes of red and blue that become mirrored in the top and bottom reflectors, ultimately accentuating the futuristic design aesthetic Panton is known for.

The VP Globe is available in a number of different iterations. Discover more in the 'Product Range' below.

DIMENSIONS

Small: 40cm dia

Large: 50cm dia

MATERIALS
