

Two-Slot Toaster

£90

DESCRIPTION

Two-Slot Toaster by Zwilling Efinigy.

Start your mornings off right with the Two-Slot Zwilling toaster, a sleek toaster designed to produce consistently evenly brown toast that is crispy on the outside and soft on the inside.

The 1000-watt toaster features seven browning levels and three automatic programmes: the warm-up feature to reheat cold toast, the thaw feature to toast frozen bread, and the bagel feature, which creates the perfect toasted bagel.

The handsome toaster has four separate heating elements to ensure that both sides of every slice are evenly toasted and has a built-in safety feature so that the toaster automatically shuts off to prevent burnt toast.

Astutely designed, the toaster has a soft-lift feature that gently lifts your toast when it is ready and allows smaller pieces of toast to be removed from the toaster easily.

DIMENSIONS

17w x 29d x 21cmh

MATERIALS

Made from steel.

Available in black.
